PROJECT DESCRIPTION

How will your project benefit your community and create opportunities to have conversations on how to improve community health, safety and wellness in general? (must benefit at least 10 young people) (Please attach a calendar with project details):

There 10+ students involved with OC Queers creating the design and putting the work into that mural. Furthermore, the mural piece is a way of building community through the process of painting and gathering within that space during important events such as Trans Day of Remembrance.

How can you continue to stay involved with Resilience's related work even after the mini-grant program? How can you help make sure your program continues to grow?

Although the project would be done within the time span of 2 months (design and labor), OC Queers plans on expanding and partnering with other business to create even more mural pieces in front of QTIBIPOC businesses. Moreover, as the project is replicated, it can be focused on local QTIBIPOC history that celebrates the community.
